## DETAILED ACTION

### *Specification*

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested:

SEMICONDUCTOR DEVICE HAVING GATE INSULATING FILM COMPRISES  
ORGANIC RESIN.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 6 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Both claims recite: wherein said organic resin comprises BCB.

Since the abbreviation "BCB" can stand for many things, thus, the claims are indefinite.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim et al. (U.S. Patent No. 6,100,954).

With respect to claim 1, Kim teaches a semiconductor device as claimed including:

a substrate (111);

a semiconductor film (119) provided over a substrate (111); and

a gate electrode (113) provided over the semiconductor film (119) with a gate insulating film (157) therebetween,

wherein the gate insulating film (157) comprises an organic resin. (See Fig. 13B).

With respect to claim 7, Kim teaches a semiconductor device as claimed including:

a substrate (111);  
a semiconductor film (119) provided over substrate (111);  
a channel region provided in the semiconductor film (119); and  
a gate electrode (113) provided over the channel region with a gate insulating film (157)  
therebetween,

wherein the gate insulating film (157) comprises an organic resin. (See Fig. 13D).

With respect to claims 2 and 8, semiconductor device of Kim is capable of incorporated into one selected from the group consisting of a personal computer, a video camera, a mobile computer, a goggle type display, a player using a recording medium, a digital camera, a cellular phone, and an electronic book, as claimed.

With respect to claims 3 and 9, the semiconductor film (119) of Kim comprises a material selected from the group consisting of silicon.

With respect to claims 4 and 10, the semiconductor film (119) of Kim comprises crystalline semiconductor.

With respect to claims 5 and 11, the substrate (111) of Kim is selected from the group consisting of an insulating substrate.

With respect to claims 6 and 12, the organic resin (157) of Kim comprises BCB.
